Sealers

Water Based Acrylic Sealer, 8400

This product is a one component, water based sealer that offers excellent resistance to water blushing without the objectionable solvent odors associated with solvent based sealers. This product has a fast set time and good stain resistance. It is recommended for sealing concrete or cement. Lower gloss version also available (**8401S**)

Typical Applications Include:

- Patios and Porches
- Sidewalks and Driveways
- Over Stamped Concrete
- Entryways
- Swimming Pool Areas

Acrylic Sealer, 6414/6415

This sealer is a one component high-gloss product that takes dull looking concrete and gives it an attractive “wet” appearance, while sealing and waterproofing the surface. This product can be used in a variety of residential and commercial locations to restore the appearance of decorative concrete.

Product Benefits:

- Retains its gloss very well
- Seals and waterproofs concrete
- Open to foot traffic in 3-5 hours
- Easy application- power wash, apply
- Great for decorative concrete

Refer to individual tech data for complete details.

Densifiers

7937, Concrete Densifier is a one component water based, lithium based designed to densify cement and concrete. The lithium based densifier reacts with the cementitious ingredients to densify while allowing deep penetration to chemically harden and fortify the substrate.

This product increases durability by improving resistance to freeze thaw effects, seals against moisture damage, and reduces efflorescence of natural stone, precast stone, and cement.

7939, Concrete Densifier/ Waterproof is a one component water based siloconate and lithium based solution. This product is designed to densify and add waterproofing characteristics to cement and concrete substrates.

After the chemical reaction occurs, the substrate will be more abrasion resistant and help protect the surface from wear, moisture, and efflorescence while remaining breathable.

7940, Concrete Conditioner is a one component water based ultra-small particle size self-cross linking hydrophobic organic polymer and silane/ siloxane. This product is designed specifically for use in the grind and polish of concrete/cement as a surface conditioner and stain guard. NP7940 should be applied before the final polishing step to increase long term performance, gloss and stain resistance.

Cleaners/Waxes

CLEANERS

We offer a variety of heavy duty cleaners for use on a variety of substrates.

NP915, Easy Cleaner is a heavy duty cleaner formulated for versatility and dependability.

NP916, Multifunctional Cleaning Concentrate is a multi-purpose cleaner concentrate that has a high sudsing action.

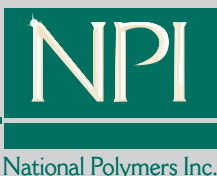

FLOOR POLISH

Provides a protective layer over many surfaces, long term gloss retention.

NP7961, Polymer Floor Wax Concentrate is a one component highly durable floor wax. This product performs well in low maintenance and high speed floor finish programs. Can be used over many coatings and surfaces with excellent scratch and mark resistance.

Solutions to keep floors clean and looking fresh!
