Floor Cleaning and Maintenance

What is Best Type of Cleaner?

For **light duty cleaning**, a neutral pH cleaner is recommended. ***NP915, Easy Cleaner***
On **more heavily soiled floors,** a higher alkaline cleaner may be more productive. ***NP916, Cleaner***

CAUTION! Although unlikely, some cleaners may affect the color of the treated surface. Always test cleaners prior to use.

How Often Should Epoxy Floors Be Cleaned?

The cleaning schedule will depend on floor usage. Light service areas may only need swept daily. Heavily used and soiled floors could require more frequent service.

How To Clean Epoxy Floors

01 REMOVE DEBRIS
Using a broom, dust mop or floor sweeper remove all dust and debris from the floor.

02 MIX CLEANER
Mix cleaning concentrate with water according to manufacturers instructions.

03 APPLY
Apply floor cleaner using a mop, medium flex bristle deck brush, or automatic floor scrubber.

Do not use a mop on textured floors.

04 DWELL TIME
Allow the cleaner to remain on the floor surface for 5 to 10 minutes.

05 REMOVE & RINSE
Remove cleaner first then rinse with water using a mop, wet vacuum or automatic floor scrubber.

Squeegee can be used on smooth floors.

Extend the Life of Your Floor

Clean Spills Right Away
Leaving spills can cause the floor to discolor or damage the coating.

Avoid Stiff Brush
Avoid use of stiff bristle brushes as they can dull out the floor coating.

No Methylene Chloride
Do not use cleaners with this chemical; it is designed to remove epoxies & urethanes.

Polish Floor
Polish the floor using a polymer floor wax to restore original gloss.

Do Not Drag Objects
Avoid dragging heavy or sharp objects on floor, including pallets. Use a hand truck.

Use Furniture Pads
Place pads on legs of chairs, tables, and other furniture to prevent marks and scratches.

Maintain Equipment
Wheels on fork trucks and hand trucks should be maintained to avoid scratches.

Polymer Floor Waxes

Using a polymer floor wax can help revitalize your floor system and restore gloss.
NP7961, Polymer Floor Wax Concentrate is easy to apply and provides a protective layer with excellent scratch and mark resistance. This product is an excellent addition to routine maintenance programs.
