

Prepare/Maintenance Products

Repair, Seal, Prep Products

Available products for use in repair, surface prep and maintenance of concrete.

Crack Repair

These crack fillers and concrete repair products are designed for repairing crack and defects in concrete or masonry. We have several formulations, including repairs for both horizontal and vertical applications.

818 Epoxy Crack Filler

- 100% solids epoxy crack filler
- Horizontal or vertical application
- 1:1 mix ratio
- Can be topcoated immediately

821 Low Modulus Fast Set Gel

- 100% solids epoxy gel
- Horizontal or vertical application
- 1:1 mix ratio
- Fast set gel- consistency of petroleum jelly

601/602 Underwater Repair

- 601: Pourable crack filler
- 602: Crack filler paste
- 2:1 mix ratio
- Designed for underwater repairs

929 Novolac Crack Filler

- 100% solids novolac crack filler (gel)
- Horizontal/vertical application
- 2:1 mix ratio
- Designed for chemical exposure areas

443 Crack and Spall Repair

- Polyurethane hybrid quick repair
- Repair of hairline cracks, spalls in concrete
- 1:1 mix ratio, dual cartridge system
- Wide temp. application range: 0° to 110° F

343 Concrete Quick Fix Patch Kits

- Hybrid urethane packaged with sand
- 1:1 mix ratio
- Cures in temps as low as 20°F
- Quick repair of cracks and spalls

Refer to individual tech data for complete details.

Joint Sealants

These joint sealants exhibit excellent flexibility and are available in both vertical and horizontal formulations. Several variations are available to meet the needs of your next project.

829 Flexible Joint Sealant

- Excellent flexibility
- 1:1 mix ratio
- Exceptional adhesion
- Pourable sealant

830 Fast Set Flexible Joint Sealant

- Excellent flexibility
- 1:1 mix ratio
- Fast set sealant
- Tube sets & kits

829HV Flexible Vertical Joint Sealant

- Excellent flexibility
- 1:1 mix ratio
- Vertical formulation
- Marginal trowel, putty knife

928 Chemical Joint Sealant

- Excellent flexibility
- 4:1 mix ratio
- Pourable sealant
- Chemical exposure areas

928HV Chemical Vertical Sealant

- Excellent flexibility
- 4:1 mix ratio
- Marginal trowel, putty knife
- Vertical chemical exposure areas

Refer to individual tech data for complete details.

Special Use Prep Products

MOISTURE VAPOR BARRIER

409, Moisture Vapor Barrier is a two component 100% solids epoxy seal that can help control moisture vapor emission rates up to 20lb/24hr/1000 sq. ft.

This primer can help alleviate some of the issues associated with moisture vapor in concrete. Meets the ASTM F3010 product requirements for vapor permeance at the recommended thickness.

OIL STOP COATING

820, Oil Stop Epoxy Primer exhibits excellent characteristics for coating over petroleum-based oil contaminated concrete. It allows for excellent substrate penetration that results in outstanding adhesion.

This product is an ideal primer for automotive service bays or machine shop floors prior to applying a suitable flooring system.
